You have to use your finger to move the video game away from you, to eat, to fight and to interact. This gets very tiresome because you can only work with one finger at once. what are your thoughts on the release of the new Battlefield 4 expansion? Comment below. 27 COMMENTS Great news BUT, won't the balance between premium pack and single player be different from what is for BF3? I know I'll be getting be BF4 but I hope they give us DLC packs as a free to play experience =D I really hope there are a lot more BF4 DLC releases, as I always turn into a huge imperial cop when I play BF3. I want more for BF4 so I hope they'll release more BF4 DLCs. So everybody will be eligible of getting most weapons for BF4 where as they couldn't get the premium in BF3, for rest of the world. - Style based in the 80s: The original kits and the green glow of a rainy day! This is a game for people that love retro style games. So, it might seem a bit boring or repetitive to you, but don't get me wrong, this is a game designed for an easy learning curve (you don't need to be a gamer to play). If I could choose between having a hero and a lot of legendaries or having a lot of heroes and a very small number of legendaries, I'll pick the first one. The reason behind this decision is because of the scarcity of Legendaries. People that play games know that having a lot of legendaries is the key to a good experience. But this is true only if you find a good balance between legendaries and heroes. In this game, at the end of the day, we have to find the right balance to make players be happy. The amount of legendaries you will find is proportional to the difficulty you will find for unlocking them. As a result, legendaries will be as rare

as they should be. But I am not only into retro games, so I made this. The game has a retro style and I'm a retro gamer. But don't expect to find a game that looks like a retro game. Aquaphobia is not a retro game, it is a Game Made for Mobile. The main reason behind that choice is the mobile market. Mobile is the market that will be receiving the most graphic updates to the game. Players won't see anything new in graphics (except the vegetation system which is not intended to be 'retro') but they will see a lot of things in terms of gameplay that would not be possible for a game designed for PCs. You are about to embark on a challenging quest to reach the core of a deadly planet. You will face dangers in high technology, bizarre environments and even warring factions. A real world Adventure awaits, with Google Earth™ at your side! Exploration/Adventure : Learn how to use Google Earth™ to place your
