

RE:Advance 07-08 11:15 AM RE:Advance Hi Pritish, Could you please provide the state of employment of your wife. If she is a U.S citizen, even if she was in H1B, she can't be fired. She is not protected under any law. Only a court decision can force them to pay her for the amount of H1B on the H1B visa. Your wife should be able to apply for H1B VISA or H1B extension. I am confused why these two are always mixed up. If you are concerned about getting married to a US citizen. Any money earned from H1B visa can be counted towards your divorce settlement. She can also be a US citizen. Even if she has H1B, she has H4EAD. Not a legal expert. Thanks for helping. Comment RE:Advance 03-11 03:39 PM I do agree with you. But I don't know how to play this game of guessing. Guessing the past is wrong. Is my guess right or not?? Do you have an estimate on how long it takes??? I would really like to know. Comment RE:Advance 03-15 10:29 AM Guess what? Everybody, including me, is on H1B visa. I'm on H1B visa, but for not America, but International sales. So, I do not think that I will ever get fired. For the case that I may lose, I bought enough legal stuffs for the worst scenario. Comment RE:Advance 03-19 05:53 PM Doesn't matter. I got a J.S.O visa while I was working as a project manger at a consulting company in NY. I spent 9 months in work visa and I got hired for another project management position in Washington DC. Because I was there on work visa, I got paid the first full year salary with full benefits(allocated to payroll) and they gave me expat job visa, which made me to stay in US on continuous basis. So my wife and I can argue that I'm already earning my green card because I was earning good salary as a consultant in NY, but I'm actually not being counted as legal 1cdb36666d

This is the link..Q: Login to an android app using link from desktop browser I want to develop an application in which I would like to login to my android app via a link (generated dynamically by the desktop browser). I have already developed an application that when a link is clicked it redirects to the app. How could I add this feature in android? I can see a few ways :- either by opening an intent from the browser. Is this possible? by opening the browser from the application, which will then redirect the to the login URL. Is this possible? Or any other way? A: In order to make the login page accessible from desktop browser, you need to have the login page URL as a web service call. If the link clicked redirects to web service URL, android app will get the data from the URL. So what you need to do is make a call to the URL asynchronously and then when the call is
