The world is shrinking in a world where the gaps between people are getting smaller. A secret society known as The Reformists has come forward with a dangerous plan: they want to fast-track their agenda by implanting the world population with an engineered virus using a controversial, experimental drug called Crimson Clover. The only obstacle in their way: a teenager named Sho Aikawa. He would rather die than be a part of this madness. He is a PlayStation2 shmup in a genre known as "Metroids." Mere words cannot describe the depth of the game. From its high production values to its deep story and its hidden secret labyrinths, this game can make people feel not just the way it makes them play, but the way it makes them feel. To truly understand it requires an audience willing to appreciate the genius of this game. Crimson Clover is currently in development at indie studio Little Wing. *This content is not endorsed by or affiliated with the creator or publisher of this mod. The most common treatment is mandibular reconstruction using a titanium or titanium/aluminum rod. The authors describe a technique of mandibular reconstruction after gunshot injury with a free osteocutaneous iliac crest flap. The technique was used in two cases and was effective. After reconstruction with the iliac crest free flap, mandibular continuity is established, speech is achieved, and the patient is able to assume a satisfactory social and occupational status. The osteocutaneous flap is particularly useful in cases of injuries complicated by fractures of the posterior mandible.
